Dr. Apostolos Chamos is the managing director of EASN-TIS. He holds a PhD in Mechanical and Aeronautical engineering and has more than 15 years of experience in the field of aviation and space research. He has been involved in more than 20 Research & Innovation Actions, as well as Coordination and Support Actions of the EC, aiming to assess the RTDI state of the art in Europe in the fields of aviation and to accordingly formulate strategic recommendations for implementing suitable novel policies towards meeting the evolving needs of the sector. Moreover, in the frame of similar projects, he has been responsible for suggesting strategic partnership and cooperation opportunities between the EU and third countries such as Japan, China, USA, Russia, Canada etc. In addition, he has been involved in the proposal preparation as well as the implementation stages of numerous EU-funded research projects under FP6, FP7 and H2020, where he has been responsible inter alia for setting up, executing and monitoring the projects' dissemination, communication, exploitation and networking activities.

He is a member of the EASN Association and has been authorized by the EASN Association Board of Directors to act on behalf of the Association with respect to EU funded projects. He represents EASN Association in ACARE WG5 and ACARE International Cooperation (INCO) group. He is also responsible for maintaining the EASN website and database.
